## SR-11 - COUPONS

Retailers accept coupons from their customers for a reduction in the regular selling price of an article. These coupons are classified as either manufacturer's coupons or store coupons.

A manufacturer's coupon is issued by the manufacturer of an article and allows the customer a reduction in the sales price of the product upon presentation of the coupon to the retailer. Because the retailer is reimbursed by the manufacturer for the amount of the reduction, sales tax applies to the full selling price before the deduction for the manufacturer's coupon.

A store coupon is issued by the retailer for a reduction in the sales price of an article when the coupon is presented to the retailer by the customer. Because there is no reimbursement to the retailer for such reduction, the sales tax applies to the reduced selling price of the article.
